SharePoint Readiness Intranet Assessments

Build your intranet on solid ground – not shifting sand

Our comprehensive SharePoint Intranet Readiness Assessment provides the blueprint for success, especially when taking over existing projects. In just one week, we'll give you clarity on what you have, what you need, and how to get there.

What We Assess

- **Technical Foundation:** We evaluate your Microsoft 365 environment, licensing, and configurations to identify limitations before they become problems.
- **Existing Intranet:** We analyze your current structure, pinpointing any inherited issues and opportunities for immediate improvement.
- **Content Strategy:** We map your content landscape, roadmapped business process automations, flagging outdated information and creating a migration plan that preserves what works.
- **Governance & Security:** We review your permissions structure and security controls to protect sensitive information.

What You Get

- A clear **roadmap** for intranet success tailored to your specific business needs.
- Practical recommendations to **modernize** outdated home pages without starting from scratch.
- **Best practices** for permissions and content management to ensure long-term sustainability.
- A **strategic transition** plan and improvement suggestions.

This assessment is your insurance policy against costly rework and adoption challenges. It's the foundation that transforms your SharePoint intranet from a document dumping ground into a vibrant, engaging hub that employees will love.

Let's collaborate to unlock the full potential of your SharePoint intranet – in just one week.

Contact us for a detailed quote tailored to your company's size and complexity.
