SharePoint Migrations

From “meh” to amazing – we migrate chaotic and old content repositories into structured, defined, searchable, modern and usable digital assets in SharePoint Online

Become Cloud-Ready with our Streamlined Migration Methodology

Environmental Assessment & Planning

Comprehensive analysis of your environment, content classification, risk assessment, and detailed migration planning. Technical evaluation of source systems, security models, customizations, and constraints that might impact migration. Migrate from on premise SharePoint, on premise file servers, Dropbox, Google Drive, OneDrive or other content stores.

Migration Strategy

Phased roadmap with content restructuring plans, contingency protocols, and business-aligned wave planning.

Change Management

Stakeholder communication, training needs assessment, and champion network to ensure smooth transition.

Pilot & Validation

Sample migration with full testing, performance validation, and process refinement before full deployment.

Migration Execution

Strategic wave implementation with real-time monitoring, daily reporting, and comprehensive quality assurance.

Post-Migration Support

Hypercare period, knowledge transfer, adoption monitoring, and performance optimization.

Governance Implementation

Information management framework, optimal permissions management, and modern SharePoint feature enablement.

Why Our Migration Approach Succeeds

- ✓ Minimized Business Disruption – Carefully planned waves aligned with business priorities
- ✓ Risk Mitigation – Comprehensive testing and rollback protocols for every scenario
- ✓ Content Enrichment – Transform disorganized content into valuable digital assets
- ✓ Technical Excellence – Experienced team with 10+ million documents successfully migrated
- ✓ South African Context – Understanding of local compliance and business requirements
- ✓ User-Centric Approach – Change management that ensures high adoption post-migration
- ✓ Beyond Technical Migration – Governance and optimization for long-term success
